Napoli (Italy)

A central system for the management of a multimodal transport.

With the set up of a central system managing the sharing out of the earnings between thireteen trasport operators the region of Campanie around Napoli is acheiving its policy of common fare.

Consortium Unicocampania, concerning 13 transport operators has chosen ACS for the supply of a central system of supervision and one thousand of counter terminals and fifty portable devices. This solution will interface with all the existing systems and will have in charge the sharing out of the earnings before end of 2009.

Since 2000 Unicocampania has established a common fare policy with 11 areas concerning 5.6 million people and 551 cities . The tickets can be used on metro tramway and funicular : they are based on Calypso for annual subscribers.
