

CNA and industrial Partners 2009 meeting

lundi, 27 avril 2009

Last Updated dimanche, 07 mars 2010

Answering to CNA's invitation, several industrial partners of Calypso were present at the lunch organized in Paris Gare de Lyon on the 10 Th. of April.

The main goal of this meeting was to have a common brain storming about how to optimise the win-win collaboration between all the parties in order to speed up the worldwide development of Calypso within the strict respect of the rules of competition.

It was suggested to create an operational working group where can participate all the Calypso partners and focusing on the following tasks:

- issuing a white paper describing the main values of Calypso not only at the technical level but also at the business level which will be used by all the parties to reinforce the message sent to the user.
- issuing a letter referring the main success stories of Calypso
- identification of projects of reference in the world which can be common showcases for demonstration of the values of calypso or the advantages of new functionalities or new version like the Javacard applet.

At the end all of the participants were satisfied with the quality and the openness of the exchanges and they agreed to meet again at least once per year.
